Web Projects

Tesla Clone 🚗

tesla-clone.herokuapp.com/

A personal project I did trying to clone the TESLA website, to further my understanding of React framework and Javascript.

Gym-AI 🏋️

www.gym-ai.com

A team project where I had a hand in the entire process, with focus on front-end and design but as well as back-end coding including Javascript. We used the GPT3 API.

Artistible 🎨

artistible.herokuapp.com

An Airbnb clone app where you can hire artists near you to create unique commissioned projects.

Rails Watch List 🎬

renato-movie-list.herokuapp.com

A simple rails app where you can create and save your movie list (API call + Cloudinary)

TinyMe Studios 📷

renatodelboni.me/TinymeStudio

A landing page for a photographer client, mainly using a lot of HTML/CSS with some javascript

Hobbies + Interests

Short Movies

In my spare time I like to create short films or edit other people's projects. This type of media has always been a passion of mine - you can find some examples here [DelboniMedia](#)

I also play and record many sports events, mainly soccer, check it out here: [RDSports](#)
